1898—	De Gerlache	71 36
1900—	Borchgreivink	73 50
1902—	Capt. Scott	82 17
1909—	Lieut. Shackleton	88 23

*111 miles from the pole

The last word which was heard from Amundsen before his dash to the pole was received in New York on January 8, 1911. After describing the splendid quantities of the Fram during its 16,000-mile voyage, and the care taken of the 190 Eskimo dogs, which had become 115 at the time of landing, he said:

"We sighted the mighty barrier at 2:30 p. m. January 11. One would be less than human if one could behold such a sight unmoved. As far as the eye can see, from western to eastern horizon, this wall of ice rises perpendicularly to a height of 100 feet. And yet it is only a very small part of it that one sees. What must the man have thought who first came upon this wall, and for whom all further advance seemed an impossibility? It was one of the world's boldest and cleverest sailors (not to say the cleverest of them all), James Clark Ross, who, after making his way through the ice pack with his two sailing vessels, the Erebus and the Terror, came, in February, 1842, upon this remarkable ice wall. Even at that time he observed the great bay, but, of course, did not venture into it with sailing vessels. For years after the barrier was regarded as a bar to all further advance southward.

Barrier Is a Level Plain.
"It fell to the lot of a Norwegian, Carsten Borchgreivink, in the Southern Cross in 1900, to prove that this was not the case. He succeeded in entering a small bay (which has since disappeared and been merged with the adjoining great bay), and thence getting on to the barrier. Here he made a short expedition and found that the barrier extended southwards in the form of a wide, level plain, reaching as far as the eye could see. This demolished the theory of its unassailable character, and opened the way towards the south. Subsequently an Englishman, Captain Scott, succeeded in landing in MacMurdo strait and thence made an expedition southwards. Sir Ernest Shackleton's brilliant expedition in 1908, in which he reached a latitude of 88 degrees 23 minutes, will be known to everybody.

"The great bay, running southwest into the barrier, which I have chosen as the base of an expedition towards the south pole, has been observed not only by Ross and Borchgreivink, but also by Scott and Shackleton, and thus appears to be a constant formation, something that can be counted upon. Shackleton also thought he saw a ridge of hills at the head of this bay, which would indicate land. After reading these various accounts and thinking the matter over, I came to the conclusion that this bay, which has been proved to have had the same situation for a period of 60 years, could not be a chance formation in the barrier caused by the breaking off of icebergs, but must have been produced by underlying land or rising ground. If not, the barrier would have continued its course unchecked and no bay would have been formed.

Cruises Along Ice Barrier.

"The day after we sighted the barrier we reached this bay, still in the same situation—about longitude 161 degrees west. It was so full, however, of recently broken up bay ice that there was no question of getting in. We therefore took a little run eastwards along the edge of the barrier to await events. The next morning (January 13) we returned, and then found that so much of the ice had floated out that there was an opportunity for us to get in. My belief as to the origin of the bay was strengthened as we got farther south; the formations stood out more clearly and sharply, and at the southern end we could distinctly make out hills and valleys. It was certain that underlying land or shoals here arrested the course of the mighty glacier, and forced it out to either side. There would be no perilous wintering on a floating barrier. The ground was safe enough.

Land on Barrier.

"On the following day (January 14) we found a landing place well suited for our enterprise. The long 16,000 miles' voyage was safely accomplished, and we were only one day out in our calculation. We had ar-

tived a day too early.

"After having safely moored the vessel to the ice we set off to find a suitable place for wintering. This did not take long. About two and one-half kilometers from the ship, at the foot of a ridge, well protected from the southeast winds, we found an ideal place; and on Monday (January 16) we began to unload our cargo. Two men at once set about the erection of the house, while the rest of the land party continued to bring up the building materials and provisions. With our 115 dogs we had draft power enough, but it was often slow work getting the heavily laden sledges up to the site, which lies at a height of 150 feet. But our dogs know how to draw. It is a pleasure to work with them. They are all picked animals from Greenland.

His Solidly Built Camp.

"It is three weeks since we began the building of our station, and now everything is ready. The desolate, icy landscape has undergone a great change. The silence is broken. Where formerly only a solitary penguin or the track of a seal crossed the height there now lies a whole little village. Our solidly built little house stands safe and secure, sunk four feet down in snow as hard as rock and supported by backstays on all sides. We have given it the name of Framheim. Its longitude is about 164 degrees west, its latitude 78 degrees 40 minutes south, so that it is probably the most southerly human habitation. Round it are set up fifteen tents large enough to accommodate sixteen men each, for the use of the dogs and as storehouses for our provisions, coal, wood, clothing, etc.

"The principal food depot is about a kilometer from the station and contains provisions sufficient for two years. Since we came here we have lived almost entirely on seal meat, and would not exchange seal steak for any dish in the world. There are great numbers of seals here, and we shall soon have preserved enough both for ourselves and all our dogs for the winter.

"We Shall Do What We Can."

"In a few days the Fram will be ready to leave us. She goes north with greetings and messages and we shall begin our journey towards the south. It is my intention to lay down a main depot in 80 degrees latitude, and a smaller one as far south as possible; and I hope that, with the excellent means at our disposal, we shall get to 83 degrees with the small depot as early as the autumn, before the dark season sets in. I can say nothing more with regard to our future prospects. We shall do what we can."

SKETCH OF CAPT. AMUNDSEN.

Arctic Exploration Has Been the Dream of His Life Since Early Manhood.

Road Amundsen, now about 46 years old, has proved himself one of the most competent explorers. Besides reaching the south pole he is the first and only man to accomplish the long attempted feat of taking a ship from the Atlantic to the Pacific by the northwest passage. He has made at a point within a short distance of the magnetic pole the only set of complete polar magnetic observations ever taken.

Amundsen was born at Sarpsburg, Norway, and in his childhood moved with his parents to Christiania. His parents destined him for medicine. For one year he was a medical student, but at his mother's death, when he was 19 years old, he gave up the intended career and went to sea. For a number of years he cruised in the north as a whaler and sealer on Norwegian vessels.

Amundsen had his first taste of exploration when in 1897 he went as first officer with the Belgica on Gerlach's Belgian polar expedition. From what he learned of the work and adventure of exploring on this trip and from the second Norwegian polar expedition of 1898, he became filled with arctic ambitions of his own. He formed the project, not of attaining the geographic pole sought by so many, but of trying the long-neglected northwest passage and approaching and studying while on his way the little known magnetic pole.

It took Amundsen several years to prepare himself for his trip. For two years he studied, first in Hamburg under Neumayer, authority on magnetism; in Berlin under Schmidt, and finally at Wilhelmshafen under Gorgen in the meteorological station. His mental preparation over, he spent two years more in raising funds and outfitting his expedition.

The Amundsen magnetic expedition was perhaps the most modestly appointed that ever went for purposes of discovery into the arduous field of the arctic. Its cost was \$30,000, a large part of this Amundsen's own money. Frithof Nansen, the Norwegian polar explorer, a close friend and faithful helper of Amundsen, helped raise another large part. Amundsen was finally able to put off from Christiania in the little 47-ton sloop Gjoa on June 17, 1903.

Voyage of Gjoa.

The Gjoa sailed around the north end of America, reaching the mouth of the Mackenzie river about September 3, 1905. It went by way of Baffin's bay, Lancaster sound, Barrow strait, Peel sound, James Ross strait and Rae strait. Twice it wintered in the ice. For a period of many months during this voyage Amundsen maintained an observatory on King Williams land, at latitude 68 degrees 30 minutes, longitude 90 degrees west, within 90 miles, as he calculated, of the magnetic pole.

CAN YOU ASK MORE?

Your Money Back for the Asking. You Promise Nothing.

We are so confident that we can furnish relief for indigestion and dyspepsia that we promise to supply the medicine free of all cost to every one who uses it according to directions who is not perfectly satisfied with the results. We exact no promises and put no one under any obligation whatever. Surely nothing could be fairer. We are located right here where you live, and our reputation should be sufficient assurance of the genuineness of our offer.

We want every one who is troubled with indigestion or dyspepsia in any form to come to our store and buy a box of Rexall Dyspepsia Tablets. Take them home, and give them a reasonable trial, according to directions. If they don't please you, tell us and we will quickly return your money. They have a very mild but positive action upon the organs with which they come in contact, apparently acting as a regulative tonic upon the relaxed muscular coat of the bowels thus overcoming weakness, and aiding to restore the bowels to more vigorous and healthy activity. Three sizes, 25c, 50c, and \$1.00. Remember, you can obtain Rexall Remedies only at our store.—The Rexall Store. HAYNES & TAYLOR, Marion, Ky.

First of French Monarchs.

History concedes that Clovis I. was the real founder of the French monarchy, although his father, Childeric, held some sort of tribal rule over part of the country which was destined to become France. Clovis was a progressive king and vastly extended his domains during the period of his rule, from 481 to 511. He made endless war on surrounding tribes and took territory right and left by conquest. In 493 Clovis took Paris by storm and thereupon that city became the permanent seat of the French government.

There is more Catarrh in this section of the country than all other diseases put together, and until the last few years was supposed to be incurable. For a great many years doctors pronounced it a local disease and prescribed local remedies, and by constantly failing to cure with local treatment, pronounced it incurable. Science has proven Catarrh to be a constitutional disease, and therefore requires constitutional treatment. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, Ohio, is the only Constitutional cure on the market. It is taken internally in doses from 10 drops to a teaspoonful. It acts directly on the blood and mucous surfaces of the system. They offer one hundred dollars for any case it fails to cure. Send for circulars and testimonials.

Address: F. J. CHENEY & CO., Toledo, O. Sold by Druggists, Etc. Take Hall's Family Pills for constipation.

When Patches Were Popular.

In the eighteenth century the tending of a beauty's face and the nice adjustment of the patch was one of the serious businesses of the day, and occasionally if my lady or her thing woman could not agree on such a momentous question then were my lady's gallants called in to decide whether these important patches should be so placed as to draw attention to the mischievous eyes, to the feeble dimple, or to the exquisite turn of snowy throat.

Special "ZEMO" Offer.

No doubt you've heard or know of ZEMO, the popular and thorough skin and scalp cure—its fame has spread from ocean to ocean, and it has many friends in these parts. The makers appreciating that there are many who would like to test the curative qualities of ZEMO and ZEMO SOAP, have prepared a special trial package, which we offer at only 25c. It contains a generous bottle of ZEMO, a small cake of ZEMO SOAP, and a 32-page booklet, "How to Preserve the Skin." The purpose of this trial package is to win thousands, yes hundreds of thousands of new users of ZEMO and ZEMO SOAP. If you are troubled with Eczema, Pimples, Itching Skin or scalp ailments, do not fail to avail yourself of this opportunity to test ZEMO. Get the 25 cent trial package today at Haynes & Taylor's drug store, Marion, Ky.

Gives Prompt Relief

William H. Douglas, Jr., of Washington, D. C., says: I take great pleasure in informing you I have used Dr. Bell's Pine-Tar-Honey, and it gave me almost instant relief.

HARDESTY

I will take the pleasure of speaking in behalf of our little community this time.

We have plenty of mud, some snow and a little water, yet. Farmers say they feel like mules for they have had such a long rest.

Freeman Tabor, who has been very sick, is improving.

Miss Grace Myers is still in Paducah having her eyes treated.

The farmers of this section, have sold a large number of hogs. The report is there are only four fat hogs in the country at present.

Mark Belt is supposed to be a very prompt boy, as he was seen passing through here in the mud to fill his appointment.

There has been plenty of water in Deer Creek for boats to pass from here to the river, for three weeks.

Mr. Hardy, of Brookport, Ill., is rafting logs here this week.

Marion Mathus, of Ozark, Ill., was visiting relatives in these parts last week.

Miss Edna Cash, of Lola, was the guest of C. H. Tabor and family last week.

John Hardin was lost in the fog last Friday morning while going from the house to the barn,—having no fog horn he found himself at a muskrat hole.

It is reported that a fur hunter from Indiana, is coming in these parts. Boys you had better call on the barber.

When you feel discouraged, con-
tired, worried or nervous
fused, it is a
sure sign you need MOTT'S NERVE
RINE PILLS. They renew the
normal vigor and make life worth living.
Be sure and ask for MOTT'S NERVE
RINE PILLS. Price \$1.00 by drug-
gists.—Williams Mfg. Co., Props.,
Cleveland, Ohio. Sold only by J. H. Orme,
Marion, Ky.

Fortune Reported Found in an Unknown Garret.

Clarksville, Tenn., March 19.—A report received here Thursday morning states that E. H. Garrott found \$10,000 in gold stored in the attic of the residence of his sister's, Miss Mary Anna Garrott, near Longview.

In making an alteration in the building, the story goes, Mr. Garrott went into an unused loft under the roof, where he discovered the money stowed away in two large stone jars. The money was mostly in one dollar pieces.

The Garrotts are wealthy. The building in which it was found has been handed down for several generations and the money was very probably put there by some member of his family.

A Smooth Skin

Black Heads, Chaps, Pimples, Sores and all unhealthy conditions of the skin are unsightly and detract from the looks. Buy a box of Dr. Bell's Antiseptic Salve a creamy, snow white ointment, apply as directed and your skin will be as clear as a babe's. At all dealers in medicines.

Use of Powders in History.

The primary use of powders was for the adornment of the hair, dyes, and powders of blue, red and green being affected by the Saxons in place of the gold dust with which Jews and Romans were wont to sprinkle their locks. Later wheat flour and rice powder were adopted, both for hair and face, and these were not introduced into England until later Plantagenet days, when a very decided change in dress made itself apparent.

Asthma! Asthma!

POPHAM'S ASTHMA REMEDY.

gives instant relief and an absolute cure in all cases of Asthma, Bronchitis and Hay Fever. Sold by druggists; mail on receipt of price \$1.00. Trial Package by mail 10 cents. Williams Mfg. Co., Props. Cleveland, Ohio. Sold only by J. H. Orme

Relief for the Superstitious.

The composer Rossini could cook cleverly, and his most celebrated dish was a preparation of macaroni. It was a contemporary of Rossini who said, "An overturned salt cellar is only a to be feared when overturned in good dish," which is a good thing for the superstitious to remember.

Thigh Muscles of a Girl Transplanted to Kneecap.

Baltimore, Md., March 20.—Performing what is said to be a most unusual operation, made possible only by recent discovery in surgery, Dr. Wm. S. Baer transplanted the muscles of Miss Ruth Coffey, of Lenoir, N. C., in an effort to stay the ravages upon her system caused by infantile paralysis.

The girl's atrophied thigh muscles, which had been deadened by disease, were removed and grafted to her kneecap muscles, from which it is hoped they will absorb vitality.

CHILDREN INJURED

Ordinary Cathartics and Pills and Harsh Physic Cause Distressing Complaints.

You cannot be over-careful in the selection of medicine for children. Only the very gentlest bowel medicine should ever be given, except in emergency cases. Ordinary pills, cathartics and purgatives are apt to do more harm than good. They may cause griping, nausea and other distressing after-effects that are frequently health-destroying.

We personally recommend and guarantee Rexall Orderlies as the safest and most dependable remedy, which we know for constipation and associated bowel disorders. We have such absolute faith in the virtues of this remedy that we sell it on our guarantee of money back in every instance where it fails to give entire satisfaction, and we urge all in need of such medicine to try it at our risk.

Rexall Orderlies are eaten just like candy, are particularly prompt and agreeable in action, may be taken at any time, day or night; do not cause diarrhoea, nausea, griping, excessive looseness, or other undesirable effects. They have a very mild but positive action upon the organs with which they come in contact, apparently acting as a regulative tonic upon the relaxed muscular coat of the bowel, thus overcoming weakness, and aiding to restore the bowels to more vigorous and healthy activity.

Rexall Orderlies commonly completely relieve constipation, except of course when of a surgical character. They also tend to overcome the necessity of constantly taking laxatives to keep the bowels in normal condition. Three sizes of packages, 10 cents, 25 cents, and 50 cents. Remember, you can obtain Rexall Remedies in Marion only at our store.—The Rexall Store. HAYNES & TAYLOR, Marion, Ky.

Fine Bridge for Eddyville.

S. R. Glenn's bill appropriating \$9,000 for improvements at the Eddyville penitentiary passed both houses of the Legislature. 6,000 of this amount is to be expended in the construction of a concrete bridge over the creek between the penitentiary and the depot. This will be a great improvement over the wooden structure that has been in use a number of years, and it will also greatly add to the appearance of the spot.

Another of Senator Glenn's bills that passed was one under the provisions of which the fast night trains will be required to stop at the Eddyville depot.

—Princeton Leader.

For Croup

Dr. Bell's Pine-Tar-Honey is the best known remedy. Do not experiment get the genuine Dr. Bell's Pine-Tar-Honey.

Railway Project in Africa.

Five vast railway projects for the opening up of Africa are at present either in progress or seriously considered. First, there is the great Cape to Cairo Railway, whose northern and southern sections are pushing slowly to an ultimate junction in mid-Africa.

Then there is the French Trans-Saharan, and the further scheme of that nation to open the valley of the Niger and Lake Tchad with the Atlantic Coast by means of the Trans-Saharan railway. Germany also has planned the Trans-Equatorial road, her first important railroad development in Africa.

The fifth enterprise contemplates building a line from the Straits of Gibraltar southerly along the Atlantic coast by way of Casablanca and Agadir to Dakar, which is an important point of shipment for West Africa, where France has lately built an important naval station.—Scientific American.
